Informatics graduate from Telkom University with a 3.81 GPA and an experience in software engineering across media, government, and technology sectors. Experienced in building web applications using Vue.js, React.js, Next.js, Laravel, and REST APIs. Passionate about software engineering, backend development, and building scalable, high quality applications while continuously learning modern technologies.

SKILLS

Programming Languages	Go, C++, Python, JavaScript, Dart, SQL, HTML, CSS, Vue.js
Frameworks	React.js, Next.js, Nuxt.js, Laravel, Node.js, Flask, Spring Boot, Angular
Database	MySQL, SQL, PostgreSQL, SQL Server
Tools	Git, QGIS, Figma, Postman, Trello, Jira, Microsoft Office, Azure DevOps
Languages	Indonesian (Native), English (Professional)

EXPERIENCE

Information Technology Developer Intern

Pertamina Foundation

Aug 2026 – Present

Jakarta, Indonesia

- Building PFriends, an alumni networking platform designed to connect Pertamina Foundation scholarship program alumni for ongoing collaboration and community engagement.
- Developing the platform using SvelteKit and PocketBase to support features such as alumni directory, profile connections, and messaging.
- Managing and maintaining 2 Pertamina Foundation websites, ensuring uptime and content accuracy.
- Contributing to early-stage architecture and feature planning as part of a newly onboarded development effort for the alumni network.

Software Engineer Intern

Kompas.id

Feb 2026 – Jun 2026

Jakarta, Indonesia

- Shipped 20+ feature enhancements and bug fixes for kompas.id, improving reliability and user experience for one of Indonesia's largest digital news platforms.
- Built a B2B keyword management dashboard that streamlined content targeting workflows for business partners, reducing manual keyword tracking effort.
- Worked with cross functional teams in an agile environment (product, backend, design) to ship scalable frontend solutions that supported the platform's growing feature set.
- Strengthened application stability and performance through targeted code optimization, reducing recurring issues in production.

Frontend Developer Intern

Maqdis Academy

Oct 2025 – Jan 2026

Jakarta, Indonesia

- Centralized travel package and user management into a single admin dashboard, reducing manual administrative work for the operations team.
- Enabled secure, real-time data operations by integrating the dashboard with a Laravel REST API, minimizing data entry errors and processing delays.
- Cut future development time by building a reusable UI component library adopted across the dashboard.
- Improved task completion speed for internal staff by refining UI/UX consistency and state management across the platform.

Web Master

Faculty of Data Science and Intelligent Systems, Telkom University

Jul 2025 – Aug 2025

Bandung, Indonesia

- Maintained and enhanced the faculty website to improve usability and ensure up to date academic information.
- Performed web scraping and data processing to collect and publish faculty member profiles on the official website.
- Collaborated with faculty staff to manage website content and ensure the accuracy of published information.

Software Engineer Intern

Ministry of Cooperatives of the Republic of Indonesia

Jun 2025 – Aug 2025

Jakarta, Indonesia

- Rebuilt the Ministry's official website with React.js, improving page performance and user experience for public visitors.
- Delivered a data collection platform designed to support onboarding and data intake for a nationwide cooperative targeting 80,000+ cooperatives.
- Strengthened system security by implementing OAuth 2.0 authentication integrated with the Ministry's central identity system.

- Developed an AI-powered eye disease detection web application using React.js to support doctors and patients in identifying potential eye diseases through AI-assisted analysis.
- Integrated the frontend with Node.js backend services and AI inference APIs, enabling users to submit medical images and receive AI-generated prediction results through the web application.
- Built reusable and modular UI components to improve code maintainability, consistency, and scalability across the application.

- Served as Project Manager for Bebar VII, a GIS-based educational mobile application developed to support community service and educational initiatives.
- Coordinated project development across multidisciplinary teams, overseeing project planning, task distribution, progress tracking, and project delivery.
- Contributed to GIS and web-based technology research using QGIS, including geospatial data processing and application development for research and community service projects.
- Participated in organizing Digistar Company Visit, DigiLearn 2025, and Research Assistant recruitment events, while contributing to the Bebar VII project that received a Registered Intellectual Property Right (HKI).

EDUCATION

ACHIEVEMENTS

- Registered Intellectual Property Right (HKI) for Bebar VII Educational Mobile Application, Directorate General of Intellectual Property (DGIP), Indonesia (2025), Registration No. EC002025079887.
- Registered Intellectual Property Right (HKI) for Intellisight Website, Directorate General of Intellectual Property (DGIP), Indonesia (2025), Registration No. EC002025114282.

ACTIVITIES

- Hello World 2023 Committee (Logistics), Telkom University2023
- Informatics League 2023 Committee (Logistics), Telkom University2023
- Entrepreneurship and Business Division Staff, S1 Informatics Student Association2024 - 2025
- Vice Head of Event Division, Anniv Insight 2024, Telkom University2024
- Interestfest 2024 Committee (Public Relations), Telkom University2024
